

TEMPERATURE MANAGEMENT

Warming Mattress + Return Electrode¹

Compare Technology to Megadyne™ Mega Soft™ Patient Return Electrode Pads²

All-in-one underbody warming mattress with integrated electrosurgical grounding.

U501

19.5 in x 32 in (49.5 cm x 82 cm)³
2.0 lb (0.9 kg)

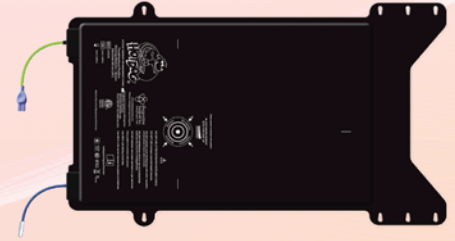

U502

19.5 in x 50 in (49.5 cm x 127 cm)³
3.3 lb (1.5 kg)

U530

23 in x 35 in (58.4 cm x 89.0 cm)³
2.3 lb (1.0 kg)

Easy to Use

- Compatible with most electrosurgical generators⁴
- Lightweight for quick & easy set up and cleaning
- One product, two functions
- Requires no skin preparation, such as shaving
- Tattoos, piercings, and implants do not interfere with return electrode performance

Improved Safety

- Eliminates risk of burns from loose adhesive pads
- No adhesive - ideal for patients with delicate skin
- Capacitive-coupling return electrodes have been used for 20+ years in over 100 million procedures⁵

Patient Warming

- Air-Free, safe, conductive heat
- Better temperature outcomes when combining a mattress and blanket

Cost Savings

- Reusable for up to 2 years
- Saves money and time compared to single use pads or other reusable return electrodes
- Reduces SKUs and ordering hassles

Environmentally Friendly

- Reduces waste from single-use adhesive pads and single-use warming devices
- Lowers pollution from shipping and transport
- Meets green initiatives⁵
